

RAW NON-AGGREGATED DATA

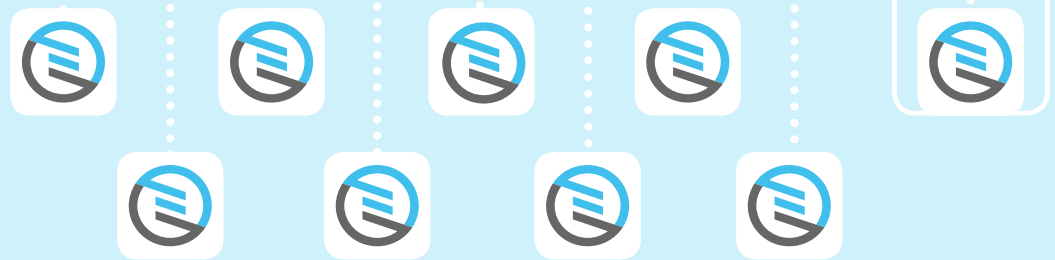

DATA SOURCES

Large financial institutions have many sources of data in a variety of locations and jurisdictions, hosted on a range of platforms and technologies. This live and granular level operational data is the best in the organisation

ON-THE-FLY TRANSLATION & AGGREGATION

- Protects, extends and enhances the underlying system
- Query data in real time
- Make opaque data transparent
- Translate native data to consumer schemas
- On-the-fly aggregation for individual consumers

 **DFPerformance**

TARGETED VIRTUALISATION

Targeted customer centric views of all your live operational data:

- timely and consistent data
- complete lineage
- no copies, no reconciliations
- instant visibility to changes of granular level operational data
- clean data to drive AI, Analytics, Apps & Reporting

DELIVERY OF SOLUTION

Agile response to any new or changing requirements
